

YALLALING

Avionics - Embedded Software Engineer | Aerospace & Defence

Bengaluru, Karnataka, India | ybhsathkhed@gmail.com | +91 7349038090
linkedin.com/in/yallaling03 | github.com/Sensationa | codechef.com/users/yallaling143

PROFILE

B.E. graduate in Computer Science and Engineering with professional experience in aerospace and defence software development. Skilled in C, C++, Embedded C, and Ada, with experience in avionics software development, Verification and Validation (V&V), and DO-178C software development and verification processes. Currently contributing to the LRLACM-02 project at TECLEVER SOLUTIONS PVT. LTD. Experienced in Java, SQL, JavaScript, HTML, and CSS through previous full-stack development experience.

EXPERIENCE

Avionics - Embedded Software Engineer

TECLEVER SOLUTIONS PVT. LTD. | Apr 2026 - Present

- Developed and validated embedded software for avionics and aerospace applications using C, Embedded C, and Ada.
- Contributed to LRLACM-02 through embedded software development and Verification & Validation activities.
- Applied DO-178C software development and verification practices for safety-critical avionics software.
- Used LDRA and Polyspace for static analysis, code verification, and software quality activities.
- Collaborated with cross-functional teams to support software quality, safety, reliability, and system performance.

Full Stack Web Development Intern

Webbers Labs Technologies | Feb 2025 - May 2025

- Developed and maintained full-stack features using Java, HTML, CSS, JavaScript, and SQL.
- Built and improved UI pages, integrated backend APIs, and resolved bugs, reducing UI issues by approximately 30%.
- Enhanced responsive design for better user experience and collaborated in deployment cycles.

TECHNICAL SKILLS

Programming Languages: C, C++, Embedded C, Ada, Java, JavaScript, SQL, HTML5, CSS

Embedded & Avionics: Embedded Systems, Avionics Software, UAV, Safety-Critical Software, DO-178C, MISRA C

Verification & Validation: V&V, Software Requirements, Software Verification, Software Validation, Software Testing, Static Analysis

Verification & Analysis Tools: LDRA, Polyspace for C/C++, Polyspace for Ada, AdaMulti, Understand

Development Tools: Git, GitHub, MATLAB, VS Code, IntelliJ IDEA, CLion, Geany, Android Studio

EDUCATION

Dayananda Sagar College of Engineering, Bangalore

B.E. Computer Science and Engineering | Dec 2021 - May 2025 | CGPA: 8.3

Alvas PU College

II PUC - Science (PCMB) | 2020 - 2021 | 91.15%

Mahalaxmi High School

SSLC / 10th Standard | 2018 - 2019 | 88.48%

PROJECTS

LRLACM-02 - Avionics Embedded Software Project

- Embedded software development and V&V for an aerospace and defence application using C, Embedded C, and Ada.
- Applied DO-178C practices; used LDRA and Polyspace for static analysis, code verification, debugging, and software validation.

Parking Management System

- Developed a Java, HTML, CSS, JavaScript, and SQL platform for vehicle logs, slot allocation, and an admin dashboard.

Plant Leaf Disease Detection

- Built and evaluated a CNN model for plant disease classification with over 95% accuracy.

CERTIFICATIONS & ACHIEVEMENTS

- Cyber Security Certification - C-DAC (Information Security, Network Security)
- Database Management System Certification - Infosys Springboard (SQL, Relational Databases)
- C++ Programming Certification - Udemy (OOP, Data Structures)
- AWS Cloud Practitioner Course - Cloud Institution (Cloud Fundamentals)
- Secured 10th place in DSCE Coding Bootcamp
- Solved 500+ DSA problems across LeetCode, CodeChef, and GeeksforGeeks
